

DO YOU LOVE HANDS-ON PROJECTS, FIGURING OUT HOW THINGS WORK, AND EXPLORING THE LATEST TECHNOLOGIES IN MAKING?

Come and spend a week this summer in the George Fox University Maker Hub!

This summer George Fox University is hosting engineering camps for high school students. Each camp week is packed with hands-on activities and projects that you will design, personalize and take home.

Choose from the following themed camp weeks:

July 11 - 15 Animal Automata Design and build an automated animal while learning the basics of mechanical engineering.

July 25 - 29 Engineering Through the Ages Travel back in time and recreate some of the most important engineering discoveries of humankind!

August 8 - 12 Unlocking the Black Box Learn the basics of electrical engineering as you design a box with that only you can unlock!
