What is a One-Page Profile?

A One-Page Bio is an effective communication tool for introducing your child's unique strengths and needs to your child's team. Give a copy to your child's school teacher, babysitter, pediatrician, dentist, busdriver, hairstylist and IEP team. This workshop is for parents and guardians of students receiving special education services in the Newberg School District.

How do I make one?

Bring a friend and come join us as we learn to summarize critical information about our child's individualized needs onto one easy-to-digest highlight page. Bring your own laptop, or borrow one of ours, as we walk through the steps together. Refreshments, treats and child care will be provided. Social distancing will be practiced.

Workshop sponsored by SEAC

The Newberg SEAC is a multidisciplinary, standing advisory council to the Director of Special Programs in the Newberg School District that is comprised of parents of children receiving special education services, parents of children who are educated in a general education classroom setting alongside children receiving special education services, and professionals within and outside of the district that are involved in serving students receiving special education services.
